ABOUT ME

Informatics graduate from Universitas Pembangunan Nasional Veteran Jakarta with hands-on experience in full-stack web development through professional internships at PT Bocorocco Entrepreneur Indonesia and PT Darya-Varia Laboratoria Tbk. Experienced in developing frontend and backend web applications, mobile applications, and machine learning-based solutions. Interested in pursuing a career as a Software Engineer, with a focus on applying technical expertise to address business needs and improve application functionality and performance.

EDUCATION

Bachelor's Degree in Informatics, Universitas Pembangunan Nasional Veteran Jakarta ***Aug 2022 – Jul 2026***

- GPA: 3.84 / 4.00 (154 credits) | Graduated with Honors (Cum Laude)

WORK EXPERIENCE

PT Bocorocco Entrepreneur Indonesia | Programmer Internship ***Jul 2025 – Oct 2025***

- Developed a full-stack e-commerce website within a 2 month development timeline, supporting online shopping, order processing, and promotional discount management.
- Developed using PHP CodeIgniter 3 and MySQL, while utilizing GitHub for version control and team collaboration.
- Developed and managed various e-commerce features, particularly the checkout process, including Xendit Payment Gateway API integration for online transactions.
- Performed testing, debugging, and ongoing maintenance to resolve issues and ensure application stability after deployment.

BNI Java Jazz 2025 | Technical Support Volunteer ***May 2025 – Jun 2025***

- Set up and configured laptops and supporting equipment for ticket scanning and event entry operations.
- Provided on-site technical support by monitoring equipment functionality and troubleshooting hardware and connectivity issues during event operations.

Darya-Varia Laboratoria Tbk | Programmer Internship ***Sep 2024 – Feb 2025***

- Rebuilt 3 internal web applications supporting complaint submissions and management across multiple company divisions.
- Migrated from native PHP to PHP CodeIgniter 4 using MySQL, while utilizing GitLab for version control and team collaboration.
- Developed and implemented automated scripts to periodically retrieve and synchronize data from the company's database server to a local MySQL database.
- Conducted pre-deployment testing, debugging, and bug fixing to ensure application functionality and stability before release.
- Participated in meetings with stakeholders from different divisions to gather system requirements, discuss application features, and demonstrate development results.

PROJECTS

CV Rembaka Agri | Inventory Management & Forecasting System ***Jul 2026 – Sep 2026***

- Developed a web-based inventory management system to monitor raw material inventory, track material usage, and forecast raw material requirements for the next 3 days using machine learning.
- Built the application using React, FastAPI, and PostgreSQL, integrating a Python-based Multi-Output Support Vector Regression (SVR) model through FastAPI.
- Achieved a best Mean Absolute Percentage Error (MAPE) of 6.64% for next-day forecasting.
- Deployed the application in a testing environment and conducted functional testing and debugging to validate system functionality.

BuzzBuzz – Movie Review Application ***Mar 2025 – May 2025***

- Developed an Android-based movie review application that allows users to explore movies, rate films, write reviews, and manage their movie-watching experiences.
- Built the mobile application using Kotlin and PostgreSQL for application development.

MediaScope – Media Monitoring Website ***Mar 2025 – May 2025***

- Developed a web-based media monitoring application using a microservices architecture to track and analyze keyword mentions across multiple platforms, including X, YouTube, and other online sources.
- Built the application using Node.js and Express.js, integrating X API and YouTube Data API for data collection, Serper.dev for additional online sources, and Redis for caching.
- Implemented lexicon-based sentiment analysis using Node.js to classify collected content into positive, negative, and neutral sentiments.
