ABOUT ME

Informatics graduate from Universitas Pembangunan Nasional Veteran Jakarta with internship experience in full-stack web development at PT Bocorocco Entrepreneur Indonesia and PT Darya-Varia Laboratoria Tbk. Skilled in web and mobile application development, as well as machine learning-based solutions. Aspiring Software Engineer focused on developing efficient applications that address business needs.

EDUCATION

Universitas Pembangunan Nasional "Veteran" Jakarta — **South Jakarta**
Bachelors Of Informatics — **Aug 2022 – Jul 2026**

- GPA: 3.84 / 4.00 (154 credits) | Graduated with Honors (Cum Laude)

WORK EXPERIENCE

PT Bocorocco Entrepreneur Indonesia — **North Jakarta**
Programmer Internship — **Jul 2025 – Oct 2025**

- Developed a full-stack e-commerce web application within a 2-month development timeline, supporting product browsing, order processing, and promotional discount management.
- Built the application using **PHP (CodeIgniter 3)**, **HTML**, **CSS**, **JavaScript**, **Bootstrap**, and **MySQL**, with **GitHub** for version control.
- Integrated **Xendit Payment Gateway API**, including payment requests and callback handling.
- Implemented TOTP authentication using **Google Authenticator** to secure payment approvals.
- Performed testing, debugging, and ongoing maintenance to resolve issues in the live application.

BNI Java Jazz 2025 — **North Jakarta**
Technical Support Volunteer — **May 2025 – Jun 2025**

- Configured laptops and ticket scanning equipment to support event entry operations.
- Provided on-site technical support by troubleshooting hardware and network connectivity issues during the event.

PT Darya-Varia Laboratoria Tbk — **South Jakarta**
Programmer Internship — **Sep 2024 – Feb 2025**

- Rebuilt 3 internal web applications to support complaint submission and management across multiple company divisions.
- Migrated the applications **from native PHP to PHP (CodeIgniter 4)** with **HTML**, **CSS**, **JavaScript**, **Bootstrap**, and **MySQL**, using **GitLab** for version control.
- Developed automated scripts to periodically retrieve and synchronize data **from SQL Server to a local MySQL** database.
- Performed testing and debugging to ensure application functionality and stability before deployment.
- Collaborated with stakeholders to gather requirements and authored **Functional Specification Documents (FSDs).**

PROJECTS

CV Rembaka Agri – Inventory Management & Forecasting Web Application **Jul 2026 – Sep 2026**

- Developed a full-stack inventory management web application to track raw material stock, monitor usage, and forecast material requirements for the next 3 days.
- Built the application using **React**, **TypeScript**, **CSS**, **FastAPI**, and **PostgreSQL**, integrating a **Python-based Multi-Output Support Vector Regression (SVR) model**.
- Achieved a Mean Absolute Percentage Error (MAPE) of 6.64% for next-day forecasting.
- Deployed the application in a testing environment and performed functional testing and debugging to validate system functionality.

BuzzBuzz – Movie Review Mobile Application **Mar 2025 – May 2025**

- Developed an Android-based movie review application that allows users to explore movies, rate films, write reviews, and manage their movie-watching experiences.
- Built the application using **Kotlin** and **PostgreSQL**.

MediaScope – Media Monitoring Web Application **Mar 2025 – May 2025**

- Developed a web-based media monitoring application using a microservices architecture to track and analyze keyword mentions across multiple platforms.
- Built the application using **Node.js** and **Express.js**, **HTML**, **CSS**, integrating X API, YouTube Data API, Serper.dev, **Redis** for caching, and **JWT for authentication**.
- Implemented lexicon-based sentiment analysis to classify collected content into positive, negative, and neutral sentiments.

PUBLICATIONS

JIKO (Jurnal Informatika dan Komputer) – SINTA 4 **Jun 2026**
